Accessible ICT Procurement Guide for Higher Education Providers

The *Accessible ICT Procurement Guide* supports universities to implement procurement policy and practice that ensures ICT products & services are accessible for people with disability.

Information and Communications Technology (ICT) can include university websites, e-learning platforms, collaboration tools, audiovisual equipment, software, and hardware.

What's in the guide?

The implementation guide supports universities by providing:

> **Templates and example RFP/RFT/RFQ questions**

> **Practical scenarios and stories of success**

> **Examples of evaluating potential purchases against accessibility standards**

> **Guidance on the accessibility of existing software and hardware**

> **Recommendations to quickly improve current ICT accessibility**

Whether you are just starting to think about accessibility in your ICT procurement process, or are well on your way, the Guide will provide you with the resources you need to ensure your procurement practices are inclusive and accessible.
